

Dual Path Communicator compatible with any intruder panel

Take your next security installation to a higher level with the enhanced SmartCom Pro 4G Communicator - the advanced gateway communication device for alarm signalling from any manufacturers panel with digital outputs. Boasting enhanced connectivity across all 4G bands the new Smartcom Pro 4G is the ideal communicator no matter the location.

- **Enhanced Reliability:** Dual path communication ensures continuous operation, switching automatically from primary path Ethernet to 4G back up if the primary path fails.
- **Improved Signal Performance:** Enhanced 4G signal strength ensures reliable communication where 2G or 4G networks coverage is available.
- **Advanced Security:** Roaming eSIMs on Texecom's private APN provide enhanced data security, reducing risks of SIM or signal interception
- **Multi-Profile SIMs:** Offers triple-layer protection for dual-path LAN/Radio or dual-radio configurations.
- **Texecom Integration:** Full compatibility with Premier Elite panels providing health checks, configuration, and updates via Texecom Cloud.
- **Transmission Category:** SP2 or DP1- DP4

Features & Benefits:

- **Versatile Connectivity:** Supports both Ethernet and Wi-Fi, allowing for flexible installation in various environments.
- **Customisable Alarm Signalling:** 10 configurable input PINS enable tailored alarm configurations for diverse event signalling needs.
- **Flexibility in Applications:** 4 configurable outputs ensure adaptability for different applications.
- **Broad Power Supply Range:** Operates efficiently on 11 to 30V, suitable for use on security or fire systems.
- **Seamless Integration:** Full serial compatibility with Texecom Premier Elite systems.
- **Universal Compatibility:** Can be used with any panel with digital outputs, enhancing its versatility.
- **Easy Configuration:** Signal configuration is automated via the Texecom Cloud service using PINS templates reducing configuration time and errors.

Product Name	Part Code	Description
SmartCom Pro 4G	CEP-0001	SmartCom Pro module with Premier Elite or Pins input and Wi-Fi or LAN & 4G connection
Accessories		
SmartCom Pro Case (Single)	JAQ-0007	EN50131 compliant housing for all SmartCom Pro products
SmartCom External Antenna	JAQ-0003	SmartCom/SmartCom Pro 4G/DR External Antenna with 10m cable and MMCX connector

The gateway to our digital services:

End user app
management

Automated remote
servicing

EN 50136 compliant
connection to leading ARCs
