# Deter. Detect. Delay.

## Security at the speed of light.

The D3 Light Blade is an external security device that combines powerful LED lighting with advanced motion detection to deliver instant deterrence and rapid response. Seamlessly integrating with the Texecom ecosystem, it acts as the first line of defence against intruders while improving safety and visibility for property owners, staff, and visitors.

## Key Features & Benefits:

- **High-Performance LED Lighting:** Bright, energy-efficient LEDs deliver powerful 2000-lumen illumination, providing instant visibility that deters intruders and improves safety for homeowners, staff, and visitors.

- **Advanced Motion Detection:** Integrated day/night PIR sensing detects genuine movement while minimising false alarms, ensuring reliable activation and energy efficiency.

- **Flexible Trigger Options:** Can be activated by detection, alarm events, or custom system programming, tailoring protection to your site.

- **Weather-Resistant, Installer-Friendly Design:** Durable IP65 outdoor housing and easy installation save time while providing reliable, long-term protection.

# D3 **Light Blade**

## How the D3 Light Blade Works

- **Detect** - PIR motion sensor identifies movement. Bright LED floodlight activates instantly.

- **Deter** - Red and blue strobe flashes on alarm, simulating police presence.

- **Delay** – Powerful lighting increases intruder exposure, slowing their attempt to break in. Texecom alarm system integration ensures full site coverage.

**120˚ Detection Angle**

**9m Detection Range**

## Installer Advantages

- Multiple trigger mode options support a wide range of system configurations and application needs.

- Supports multiple units in series or parallel for extended coverage.

- Quick and easy to mount, with an ergonomic form factor that fits neatly into corners, above door frames, and other tight installation spaces.

- Available in Anthracite, Silver and White - blends seamlessly with different frames and surroundings, ensuring discreet protection that complements any property style.

**Part codes:**

**Anthracite – Part No: DAA-0001**

**Silver – Part No: DAA-0002**

**White – Part No: DAA-0003**

## Applications

- **Residential Homes:** Driveways, gardens, side entrances.
- **Shops & Small Businesses:** Entrances, yards, and external storage areas.
- **Commercial Premises:** Warehouses, car parks, office perimeters.
- **Public Environments:** Schools, healthcare sites, and community centres.
- **Hospitality & Leisure:** Hotels, pubs, restaurants, and gyms.
- **Multi-Occupancy Buildings:** Flats, housing associations, and managed properties.
